

Creativity is...

seeing something that **doesn't** exist already.

You need to find out how you can **bring** it into **being**
and that way be a playmate with **GOD**.

and we are good
at

 **thinklive** creative digital agency

Welcome. You just made your first step.

We are full service **creative digital agency** based in Mumbai, India, delivering solutions for branding and identity strategy, interactive and visual communications for actual and future brands and organizations.

ThinkLive was created out of the belief that in order for you to reach your full potential you must be noticed.

What does that mean? Well it means that **we have** the ability, resources and experience to **execute your creative requirement.**

Why us?

ThinkLive started as a concept, as an idea in late 2006. Starting 2007, we became a group of enthusiasts who wanted to contribute to modern web and modern branding. As a combined branding / web development company, we consist of two groups, one for branding and interactive communication each.

Our clients covers from small to big national/international corporations, media publishers and, financial institutions. All our clients are equal. Every project we do is unique and treated as that.

We make the web a better place. By implementation of solutions satisfying both to our customers and us, ThinkLive is developing the best quality websites for companies from all around the world.

We also do branding. We love branding. We basically do fashion for people, companies and services. More than a passion, branding makes an important part of every presence, active or passive.

It is important to be noticed. For you and for us.

What distinguishes us from the other agencies is our flexibility and will to quickly respond to requirements.

The force driving ThinkLive is obviously its people. We remain extremely absorbed with the web and new technologies and constant learning, together with gaining more and more experience.

Our future is bright. We want to learn more and to provide even better services.

Our passion for design drives us further. What is yours?

We make websites and brands.

Interactive communication

Web sites, intranet applications, info kiosks, interactive presentations and software application interfaces are mainstream products that we offer to our clients.

Together with your identity, informational architecture and industry standard processes, we create solutions that give results. These types of media, on the web or elsewhere, provide interaction as the brand.

That is how you can act naturally and be user-friendly to your audiences. Learn to be close.

Branding & identity design

Its like your clothing. ThinkLive takes consummate care of the entire domain of visual identity. We work to discover typefaces, symbols, colors and styles that effectively translate your company, service or product essence into visible and touchable reality.

You have to realize that only long term brand strategy will become cost effective for your business. We help you build, rebuild and rethink your identity and your brand, tuning it until it becomes perfect. A brand needs to speak for you. Who are you, what do you want and why do you represent the right choice for your clients
